

500W DIGITAL FM TRANSMITTER EM 500 DDS

The 550W fully digital FM transmitter **EM 500 DDS** has been created by the OMB center of development for DDS technology. Thanks to its powerful core, crystal clear sound, accurate filtering procedures, audio processing and usage this device brings your experience to the next level. This 550W DDS FM transmitter comes with a 4.3" touch screen display, allowing an easy configuration and simple access to functions setting, operating parameters and alarms detections. It also includes a wide mode AES/EBU (192kHz broadband sampling), audio backup and many more advanced features.

MAIN ADVANTAGES

- It can be used as an independent exciter, with power output from 0 to 100%.
- Suitable for single frequency applications (SFN), audio limiter (ITU).
- Audio rescuer integrated, with programmable established time and all inputs priority (analog, digital and MPX).
- Fold back for correct protection against VSWR (*Voltage Standing Wave Ratio*) <1.35 at regular performance and >2.0 at full output power.
- Typical AC efficiency >73% and typical RF efficiency of 84%.
- Speed control of cooling fans according to temperature of power modules so as to optimize consumption and to decrease acoustic contamination.
- Advanced protection against load mismatches without transmission cuts and fast protection in case of excessive reflected power.
- Programmable power reduction.
- Automatic voltage control for efficiency optimization.
- Dual power supply.
- Solid state and compact design.
